Eden Rize

FULL STACK DEVELOPER

Profile

I am a Full Stack / Frontend developer, adept at **JS, React, Vue, Node.js** and more.

Here's a link to my personal website, check it out!

And here's a link to my latest project (an open source clone on "Monday") : Github, Website

Employment History

Independent full-stack developer

2023 — PRESENT

As an independent Full Stack developer, I provide a web-developing service to small businesses, **building end-to-end websites** by request.

I focus on creating websites that not only showcase the business, but also make it easy for the customers to navigate and engage with the products or services.

Shift Manager, Wolt Israel, Tel aviv

2021 — 2023

- Managed and led a team at Wolt's customer support
- Responsible for shift management to ensure round-the-clock coverage
- Prioritized effective communication within the team and with customers
- Oversaw customer service and courier tech support operations
- Worked on optimizing service delivery for a seamless and positive customer experience

Education

Coding Academy

I successfully completed an intensive **Full Stack bootcamp** at Coding Academy.

Acquired a comprehensive skill set in:

- React
- Vue
- JavaScript
- HTML
- CSS
- Node.js
- Express.js
- SQL

The program not only provided theoretical knowledge, but also included hands-on experience throughout the entire course, with a particular emphasis on four distinct sprint projects.
